

## Cookies

In order to collect data via this website, we may use temporary “cookies” that remain in the cookies file of your browser until the browser is closed.

Cookies by themselves cannot be used to discover the identity of the user. A cookie is a small piece of information which is sent to your browser and stored on your computer’s hard drive. Cookies do not damage your computer. You can set your browser to notify you when you receive a cookie. This enables you to decide if you want to accept it or not.

We also use your IP address to help diagnose problems with our server and to administer our website. An IP address is a numeric code that identifies your computer on a network, or in this case, the Internet. Your IP address is also used to gather broad demographic information.

We may also perform IP lookups to determine which domain you are coming from (e.g.: aol.com, yourcompany.com) to more accurately gauge our users’ demographics.
